**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-15 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 2000-297443.

The JP ' 443 document discloses a cab of a construction machine that has a display 4 and controller 3 that outputs status variables detected by sensor groups 23 and 35. Various alarms 16 signal the operator of problems detected by the sensors. The operating control means take snapshots of the operating parameters for certain time frames and displays them to the operator. A monitor station 19 is collectively transmitted data that has been stored by controller 1 and is viewable by persons other than the operator. Maintenance records are stored such as the rebuild of components.
